(1) Recommended Retail Price EC including 20% VAT.

(2) "MP" stands for MegaPixels. "3, 5, 8" means: True 5 MP sensor with 3 MP compression and 8 MP interpolation.

(3) The unit can take 1, 2 or 3 image(s) per trigger.

(4) This new time-lapse technology automatically snaps images at preset intervals of one minute to one hour, within the hours of your choice. Field Scan provides long-range observation of your hunting ground and a much larger coverage area, because it's not triggered by game. It's like glassing your spot without having to be there.

Actual Photos taken with Bushnell Trophy Cams
